

Literature review

To look at the overall picture and have deeper understanding of trends and what catches user's attention. This would also help in speculation of future trend.

Insights

We came across different styles of graphics, colors and interactions that are out in the market and their development with time.

1. Unique illustrations and animations
 2. Story telling
 3. Use of Artificial intelligence
 4. neomorphic designs
 5. Simple layouts for faster display
 6. responsive colours
- Some insights are explain with examples in further pages

Information is given through a story

Interactive content with supporting visuals

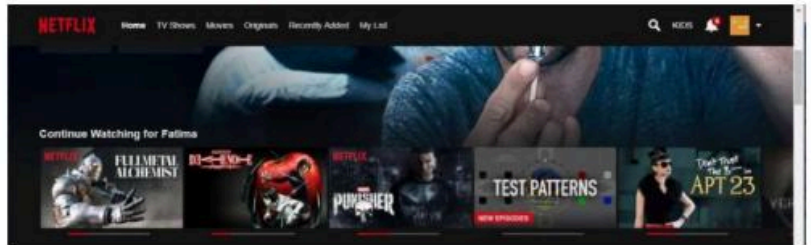

More human approach

Feedback and Microinteractions

on how much is read / what is read/ bookmark to read later/suggestions of relevant content

Good for feedback. They are simple movement or well animated interactions. They react on hover or click.
