

MITALI BORKAR

Product/User Experience Designer

I am UX designer with 5 years of experience and a Product Design degree from ISDI Parsons in Mumbai, focusing on system design. This foundation allows me to develop effective design solutions by merging various components into a unified system. In last five years have worked on projects that demanded a deep understanding of systems and customer interactions. Background in various UX experience projects -healthcare, e-commerce, bankings has deepened my insight into user behaviour. I am dedicated to crafting concepts that promote a simpler, more intelligent way of living.
